

CEMENT TESTING EQUIPMENT

For over 30 years OFI Testing Equipment (OFITE) has provided instruments and reagents for testing drilling fluids, well cements, completion fluids, and wastewater. In addition to these product lines we also offer a range of instruments for core analysis. From our manufacturing facility in Houston, TX we provide customers all over the world with quality products and exceptional service.

Our cement product line includes innovative designs such as the Static Gel Strength Measurement Device (SGSM) which showcases our ability to develop new technology to meet customer and industry demands. We also offer Ultrasonic Cement Analyzers (UCA), Constant Speed Blenders, Automated HTHP Consistometers, and all other instruments required to evaluate cement properties according to API Specification 10.

As an independent manufacturer and supplier, OFITE has one priority, our customers.

BP Cement Settling Tube

The BP Settling Tube (#122-086) is used to test the settling characteristics of a well cement. The cement slurry is poured into the tube and then cured in a Consistometer or water bath. After the cement has cured, the column is then cut into pieces and the density of each piece is measured using Archimedes Principle.

Features and Specifications

- Tests the settling characteristics of a well cement
- Includes brass tube, top and bottom cap, and two hose clamps
- Size: 8.5" Tall x 1" Diameter (23 x 2.5 cm)
- Weight: 1.5 lb (.68 kg)
